English

Malayalam

## PROJECTS

### ● Tourism Management System

A Tourism management website is an online platform designed to simplify the travel planning and booking process for travel. We have used php as back end and html, JavaScript as front end. Used frameworks are Ajax and JQuery

### ● Laundrymatic Website

It's a dynamic laundry service booking website using html, css, java script. The data from booking collected from google sheet (from customers ). The project was entirely made with the help of tutorials from YouTube.
